

The University reports that the endowment **helps fund research**, “including in the areas of quantum computing, artificial intelligence, climate science, and insights on diseases such as Alzheimer’s and cancer.”

On Oct. 3, the University announced that it would **resume accepting research funding from fossil fuel companies** that fail to meet its dissociation criteria, sparking backlash from various groups across campus.

Over the 2024 fiscal year (FY24), which ended on June 30, Princeton’s endowment generated a 3.9 percent investment gain, according to an announcement released by the University on Oct. 24. This year’s investment gain, however, has not led to an increase in the size of the endowment overall, with the 2024 value matching that of 2023 — both \$34.1 billion.

This is notably the first endowment
